Experience

T-Mobile Inc. Bellevue, WA (August 2015 – Present)

UX Engineer

- ▶ Hold design meetings with stakeholders to present desktop and iPad application designs with stakeholders.
- ▶ Communicate with stakeholders/product owners to identify their needs for design.
- ▶ Redesign Android phone native messaging/calling apps, and branding themes.
- ▶ Research/design web and mobile based collaboration tools for telecom engineers and vendors using Sketch and Zeplin.
- ▶ Work as a liaison among stakeholders, designers, and developers to ensure mobile application design and implementation delivery of mobile best practices for UX.

UX Researcher/ Interaction Designer

- ▶ Planned and conducted research in the call center, retail stores, and usability labs.
- ▶ Created prototypes and wireframes for testing using Axure and Illustrator.
- ▶ Tested both software and hardware designs with sales representatives and customers on various devices including mobile phones, tablets, web, and desktop computers.
- ▶ Presented actionable findings and design suggestions to various stakeholders to compose both quick feedback and detailed reports after research.
- ▶ Quickly revised designs to incorporate research results for the next iteration.
- ▶ Led persona research project to create persona profiles poster contents through longitudinal studies including multiple in-depth interviews and in-field observations.

Posh Technologies Inc. Bellevue, WA (June 2015 – August 2015)

User Experience Specialist

- ▶ Planned research, recruited participants, and conducted guerrilla, in-person and remote usability studies for design ideas and iterations.
- ▶ Presented results to CTO and drove discussions with the development team.
- ▶ Prototyped and wireframed mobile and web applications in Axure and Illustrator.

Amazon Web Services. Seattle, WA (summer 2014)

User Experience Research Intern, Developer Resource Team

- ▶ Conducted three studies about AWS console UI as the sole researcher.
- ▶ Planned research to study new console features under agile environment and evaluated existing UI according to stakeholders' needs.
- ▶ Moderated studies in both remote and lab settings. Analyzed data, delivered reports, presentations, and speeches to stakeholders. Initiated meetings to engage related teams to iterate problems based on study results.
